At our meeting on September 6th at 8 p.m. a gift of two books, Allan's Flora of New Zealand and Cockayne's Vegetation of New Zealand was presented to the Botany Department. In the unavoidable absence of Professor Chapman the gift was received by Miss Segar. The gift implemented the resolution passed unanimously by the Society on the evening of July 20th., which stated that "A gift in the form of books or money be donated to the Botanical Department in appreciation of the co-operation of the personnel for so many years, with special reference to Dr. Millener."
