

(from previous page)

Leaflet teeth without hairtips

Leaves (at least the younger ones) rich shining green on upper surface

Prostrate stems 1.5-2 mm diameter; leaves 30-60 mm long; terminal leaflet 9-12 mm long; leaflets smooth on upper surface

... *A. novae-zelandiae*

Prostrate stems 2-3 mm diameter; leaves 45-100 mm long; terminal leaflet 12-20 mm long; leaflets slightly wrinkled on upper surface

... *A. pallida*

Leaves dull green to slightly bluish green on upper surface

Prostrate stems ≤ 1 mm diameter; leaflets 7-11; leaflet pairs abruptly reducing in size below the 1-2 uppermost; heads on brown stalks 4-13 cm long; anthers white

Prostrate stems very slender, 0.7 mm in diameter; leaflets green, upper surface hairless; leaflet teeth 7-9, blunt ... *A. emittens*

Prostrate stems 1 mm diameter; leaflets somewhat bluish green with upper surface sparsely hairy; leaflet teeth 11-15, sharply pointed... *A. dumicola*

Prostrate stems ≥ 1 mm diameter; leaflets 11-17; leaflet pairs gradually reducing in size down the midrib; leaflet teeth 5-9; heads on red stalks 9-30 cm long; anthers red

Prostrate stems ≥ 2 mm diameter; leaflets green on upper surface with purplish secondary colouring, 9-14 toothed; head about 12 mm diameter when flowering, 10-30 mm diameter when mature

... *A. magellanica*

Prostrate stems 1-1.7 mm diameter; leaflets bluish green on both surfaces, 5-8 toothed; head 6-9 mm diameter when flowering, <15 mm diameter when mature ... *A. saccaticupula*
